Assignment: Assignment 4 - Github
Author: Trevor Sharp
Date: Apr 26, 2026

Notes:

1. While I know I can configure my Git to not require my username each time I need to authenticate, because of my Git utilization, I choose to require it to ask me my username each time. I'm fully aware I can configure it to not ask me each time.
2. Each page dedicated to one screenshot, all screenshots in order and legible.

Quick setup — if you've done this kind of thing before

HTTPS | SSH | https://github.com/TISHARP/CS1110.git

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

...or create a new repository on the command line

```
echo "# CS1110" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/TISHARP/CS1110.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/TISHARP/CS1110.git
git branch -M main
git push -u origin main
```

```
xxxxx@rust-is-the-best:~/Desktop/Projects/ENMU/CS Orientation$ git clone https://github.com/TISHARP/CS1110.git
Cloning into 'CS1110'...
warning: You appear to have cloned an empty repository.
